Explanation for Variables

- Based on the analysis, we finally found three variables highly correlating to the 5-day increase rate – Capital Inflow, LB Recevied, TZD Account, and R007. The explanation of the variables are shown as follows.

Variables	Explanation
Capital Inflow	Recode the platform's (Capital inflows - Capital outflows)
LB Recevied	Recode the amount of users' receiving lucky money of the day
TZD Account	A measurement of a find of financial product (TZD) of the platform
R007	The closing price of treasury bonds repurchase in 7 days

Solution Selection Matrix

Variables	Explanation
Capital Inflow	
LB Recevied	
TZD Account	
R007
